NEW PRODUCT BULLETIN

Network Functions Add More Convenience: AirPlay and AV Controller

AirPlay allows music streaming from a Mac, PC, iPod, iPhone or iPad. The 18-language compatible AV Controller app lets you easily operate various functions from an iPod, iPhone, iPad or Android device.

7-channel Discrete Amp and Easy Zone Expansion with Zone B Output

The RX-V575 uses discrete amp output stages, providing superior sound quality and output drive for low impedance speakers. Zone B output means that users can enjoy 2-channel sound in a second room, while the main zone has 5-channel audio (same source plays in both zones).

MHL (Mobile High-Definition Link) Support

The RX-V575 supports playback of up to 1080p video and multi-channel audio from MHL-compatible mobile phones and portable devices. It also charges the connected devices.
