What is MusicCast?

Designed with music lovers in mind, Yamaha's MusicCast technology is a 'whole-of-home' solution that uses Smart Speakers to enhance your listening experience in the spaces you love.

Connect your entire music library to each room. Listen to different playlists in every corner, send sound from the TV to the bedroom, or enjoy the same song throughout the house - all controlled from the palm of your hand.

How It Works

Treat your entire household to the highest standards in sound quality. All you need is a smartphone/tablet and a Wi-Fi network! Simply select a room, choose what you want to listen to and hear your home sing.

- The free MusicCast App is available on Apple* and Android* smartphones and tablets.
 - Providing access to a wide variety of content sources, MusicCast is featured on a range of Yamaha audio devices: Sound Bars, Smart Speakers, AV Receivers and Hi-Fi Components.
- Build your MusicCast experience by starting with 1 speaker. Up to 10 MusicCast devices can be added and controlled by the app.
- MusicCast also supports Bluetooth and Airplay.

*iOS 7.1 and Android OS 4.1 and later.

Why MusicCast?

MusicCast Smart Speakers connect to **ANY** Bluetooth device, **ANY** brand

Share music streaming services like Pandora and Spotify, vinyl, CDs...

Simple access and control to hi-res sound from every corner of the house
